

AVALANCHE FLOOR COVERINGS
... more than just floors
(970)203-1000

Get ready; our installers are coming to your house!

We want your installation to go smooth and on time, please carefully read:

What you need to do or should know before our installers arrive . . .

- ___1. **Move all** loose breakables/scratchables from any furniture that we are moving or that we may be working in close proximity. Please do not stack items on top of furniture that needs to be moved. All plants and aquariums should be moved before our arrival. If you are moving the furniture, please have it done prior to the installers' arrival.
- ___2. **Disconnect** stereos, televisions, computers, and alarm systems. We will move them out and return them to their original placement for you to reconnect.
- ___3. **Children and Pets** need to be kept out of the installation area.
- ___4. **Have your professional remove all applicable: toilets, appliances, pool tables, pianos, waterbeds grandfather clocks before we arrive.**
- ___5. **We will need a template at time of install** if you are changing any sinks, hardware, valves etc.
- ___6. If we are **moving beds**, please have the **beds stripped. In addition, please remove all items from floors of closets and under beds.**
- ___7. For some types of installations, **sanding** will be required and **dust** will be generated. We suggest that other areas of the house be sealed off with sheets or plastic. Our estimator will be glad to discuss this with you.
- ___8. **If we are removing your old carpet**, we will dispose of it for you. **If you want to keep it**, please inform our installers.
- ___9. We may need **to use water and electricity**. Please make sure these are available.
- ___10. **Carpet backing** can be rough and unfortunately *scratch* your baseboards. We will do everything to minimize scratching. If you have just painted or stained, please keep in mind that **touch-ups** might be needed.
- ___11. **Carpet Seams** may be more visible with low profile and pattern carpet.

We hope these suggestions will make the installation go smoothly and with as little upset as possible.

If we have pleased you, let us know.

If we have displeased you, let us know that too, so that we may improve!

THANK YOU

For choosing Avalanche Floor Coverings, Inc.

We hope you choose us again.
